- Mentor and guide team members to ensure the best productivity and overall satisfaction. Help with hiring new team members. Assess current technologies and advise on new ones the team could use. Determine potential risks and propose ways to mitigate them. Assert data compliance and ensure its proper adoption. Use Scrum methodology to help the product owner, and act as a Scrum Master. Design and implement application-critical parts of the *kidi* platform. Review the code of other team members and promote collaboration and engagement. Provide architectural and design directions for the company's products. Guide the development according to multiple software-as-a-medical-product standards and conduct internal audits.

October 2021 – July 2022

Data Scientist

eMedicals Healthtech GmbH, Frankfurt am Main

- Use analytical, statistical, and programming skills to collect, analyze, and interpret large medical and biological data sets. Manage algorithm development, machine learning workflows (*i.e.,* NLP and computer vision), and statistical techniques to produce solutions to problems quickly. Closely work with university partners (*i.e.*, Technische Universität Darmstadt) and research organizations (*i.e.*, Fraunhofer-Gesellschaft zur Förderung der angewandten Forschung e.V.) to improve and further develop algorithms relevant to the company. Closely monitor state-of-the-art AI and data science methods and technologies to support the evolution of the company's strategy.

December 2020 – present

Research Associate

Heider Lab, Philipps-Universität Marburg, Marburg

- Develop bioinformatics and ML pipelines for solving various omics and multi-omics problems. Adapt existing and design and implement new visualization methods for biological and medical data sets. Organize workshops, seminars, and lectures to empower further and inspire students to reach their full potential. Mentor multiple undergraduate and graduate students during their studies and while conducting research.

MOSLA (*Molekulare Speicher zur Langzeit-Archivierung*), Philipps-Universität Marburg, Marburg

- Design, implement and evaluate automatic workflows for information storage systems based on molecular storage media. Adapt existing and create new visualization methods and UIs for novel data storage technologies.
